AI WORKFLOWS & AUTOMATION CAPABILITIES

Built and demonstrated in 4 live case studies across coaching, e-commerce, real estate & healthcare ([portfolio](#)):

New lead comes in → **GoHighLevel + Zapier** → automatically tagged, followed up, and booked without manual chasing.

Customer asks a question → **GoHighLevel Conversation AI** → trained chatbot answers accurately and warmly, 24/7, with no manual reply needed.

Meeting notes captured → **Notion AI** → converted into clean action items and synced to the team board.

PROFESSIONAL SUMMARY

Operations professional with 8+ years of experience moving into remote AI-powered VA work for entrepreneurs and small business owners. Builds automated systems with ChatGPT, Claude, Notion AI, Canva AI, Zapier, Make, and GoHighLevel to cut manual work and speed up turnaround. Manages communications, schedules, and projects end-to-end with minimal supervision, and is comfortable across Google Workspace, Notion, Slack, Teams, and MS Office 365.

WORK EXPERIENCE

Teacher — World History, Economics & Entrepreneurship

2017 – 2025

Department of Education, Philippines

This classroom role built the operational backbone of my VA skill set — calendar management, stakeholder communication, and reporting at scale — now applied to remote business support.

- Managed high-volume schedules for multiple stakeholders, planning and executing 10+ events per year from logistics through post-event reporting.
- Designed and maintained organizational systems and SOPs using Notion, enabling consistent processes across teams of 30+ staff.
- Produced weekly/quarterly performance reports using MS Office and Google Sheets, and handled end-to-end stakeholder communications with zero dropped follow-ups.
- Began using ChatGPT and Claude to draft communications and summarize reports, cutting personal output time by ~60%.

Self-directed AI & automation upskilling (2024 – present): Independently learned Zapier, Make, and GoHighLevel Conversation AI — 4 live case studies in the portfolio link above.
