Four self-initiated case studies showing how I use AI and automation tools to solve real operational problems across different industries — built to demonstrate exactly how I'd approach your business.

1

Case Study: AI-Assisted Client Reply Management — High-Ticket Coaching

Problem it solves: *Cut reply time and kept tone on-brand for a premium coaching business across client inquiries, complaints, and partnership requests.*

Tool(s) used: ChatGPT / Claude

2

Case Study: Automated Lead Capture & Follow-Up — E-Commerce / DTC Brand

Problem it solves: *Eliminated manual lead follow-up for a DTC skincare brand by automatically tagging, welcoming, and routing new leads the moment they opt in, using GoHighLevel's CRM and workflow automation.*

Tool(s) used: GoHighLevel (Forms, Workflows, Automated Email)

✓ Live case study: [Watch the full walkthrough on Loom](#)

3

Case Study: Notion AI Client Pipeline Tracker — Real Estate

Problem it solves: *Organized a real estate agent's buyer pipeline — showings, offers, and follow-ups — into one system with AI-summarized meeting notes.*

Tool(s) used: Notion + Notion AI (auto-summarized meeting notes into action items)

4

Case Study: AI Chatbot for Customer Inquiries — Cosmetics Clinic

Problem it solves: *Built and trained a warm, accurate AI chatbot to answer pricing, hours, and FAQ questions for a med-spa — tested for both accuracy and empathetic tone.*

Tool(s) used: GoHighLevel Conversation AI (Knowledge Base + Prompt-Based Bot)
